CS 422 Project Task List

1. **SRS.pdf (RH/CS/WQ)**
   - Create a copy of Hornoff's to a word document
   - Need to adapt SRS to our additional changes
     - Adding in more users
     - Add in permission to use fitz/re imports

2. **SDS.pdf (RH/CS/WQ)**
   - Models need to be redesigned
     - Models need to be consistent.
     - Add UML diagrams
     - Develop software architecture and model diagrams based on class

3. **Project_Plan.pdf (NR/RH)**
   - Minutes from each meeting (NR)
   - Redraw Gantt chart (RH)
   - Update development and document logs (NR)
   - Clarify how WhatsApp and Discord communication differs (NR)

4. **README.txt (AS)**
   - A very brief description of the system.
   - The authors (alphabetical by last name).
   - When it was created.
   - Why it was created such as the class name and assignment.
   - What needs to be done to compile the source code and run the program.
   - Any additional setup that is needed.
   - Software dependencies such as the version of the compiler.
   - A brief description of what is in each subdirectory in the directory structure.

5. **Programmer_Documentation.pdf or .txt | Example (AS/NR)**
   - Comment the code (AS)
   - Technical document (NR)
     - how source code files relate to each other
     - the purpose and inner workings of each source code file, function, if-then statement, and loop
     - each line of source code, and
     - the purpose, scope, and lifetime of each variable.

6. **Installation_Instructions.pdf or .txt (RH/CS/NR)**
   - Technical
     - how to install the software (RH/CS)
     - software dependencies (RH/CS)
     - required versions of components (RH/CS)

        o   server installation (NR)

7. **User_Documentation.pdf | [Example](#) (WQ)**
   - Create a graphical document that specifies exactly how to use the software.
     - Include screenshots.
     - Entering and connecting to the server
     - Example PDFs
     - Opening PDFs
     - Taking notes in hierarchy.
     - Saving notes
